Re: Riverdale Storm Sewer Improvements  
Energy Efficiency Documentation- Exhibit 4

To Whom It May Concern:

The project for which the City of Riverdale is applying for the I-JOBS II grant funding involves the installation of approximately 1000 linear feet of storm sewer beneath an existing roadway, to alleviate flooding issues.

This project does not involve the construction of any buildings, therefore, current state building energy code and Energy Star® standards do not apply to it.

Thank you for your consideration.

Sincerely,

MSA Professional Services, Inc.

Kristin E. Crawford, PE  
Project Engineer
